DAB produces reliable products, technically advanced, easy to install and efficient, ensuring high energy savings in the following domestic and residential application sectors: heating and air conditioning, water supply and pressurisation, irrigation and gardening, use of rain water, draining, collection and disposal of waste water, circulation and filtration of swimming pool water.

DAB develops technologically advanced solutions, highly efficient and reliable, for many commercial application sectors: from heating and air conditioning circulation systems, to water supply and fire-fighting system pressurisation, to the disposal of waste water.

DAB offers pumping solutions for the extraction of water from the subsoil for agricultural and irrigation purposes. High quality submersible pumps and motors, reliable and capable of guaranteeing high energy efficiency. A wide range to meet the needs of any types of systems, up to industrial and aqueduct applications.

DAB has been a main player in the sector of the technologies for the movement and management of our most precious resource, water. DAB offers technological solutions capable of ensuring reliability and efficiency, and to optimise energy consumption in domestic and residential, civil, agricultural and irrigation applications.

“Simple and efficient solutions are the biggest types of innovations.

The technology of our products speaks the same language of those who buy or use them. This is our strength.”

For over 45 years, DAB has been a main player in the sector of the technologies for the movement and management of our most precious resource, water. DAB offers technological solutions capable of ensuring reliability and efficiency, and to optimise energy consumption in domestic and residential, civil, agricultural and irrigation applications.

“The technology of our products speaks the same language of those who buy or use them. This is our strength.”

CARING FOR THE FUTURE
It’s not just a matter of talking about performance or technical features, or even stating that we are better than the competition.

We really need to start from people; from users. And if we give them something that can simplify or improve their lives, then they will be happy to follow us.

RESPONSIBILITY
We believe that the safeguard of the environment is possible not only through eco-friendly products, but most of all thanks to responsible individuals. This is why we try to come up with reduced consumption products, working on projects with a low environmental impact, selecting partners and suppliers consistent with our ethics, and implementing green codes of conduct to increase the awareness in all those working at DAB of the importance in reducing waste and in respecting the environment, starting from the most trivial daily activities, both within and outside the company.
