DECIMA 1948

Furnishings and technology for theatre, music and performing arts
About us

Starting in 1948 Decima has acquired technical experience and new skills in the field of technology and furnishing for theatre, music and performing arts. The Company is highly qualified in managing Stage Machinery systems such as Fly systems, rigging, staging and motion control systems. Decima sews several kinds of stage curtains in velour and fabric, with decorative trimming. The company also provides acoustical solutions for theatres, stage lighting systems and public address systems, included their control systems and other equipment.

The team of Decima includes various skilled designers (architects, theatre design, mechanical engineers, electronic engineers, light designers, electrical engineers), according to the different theatre needs and requirement, project managers, site managers and specialised site workers.

The interdisciplinary teamwork of the Decima responds to the different needs and typologies of performing art systems, including the technical approach depending on whether it is historical or contemporary theatre. Decima develop innovative stage systems also for existing theatres, updating fly system technologies, improving flexibility of the stage and the safety level of their motion control system.

Decima have a long experience to manage stage technologies into peculiar historical theatres, to permit also extend the stage into the audience, increasing the flexibility of the room. At the same time is extremely important to keep a philological approach for reproduce decorative parts such as the draperies.

Due at the diversity of types of the performing arts, Decima often develop different solutions for each projects.

Decima boasts several references of projects carried out mainly Italy, due to the large number of historical theatres in the area, and all over the world. Many of them are prestigious and the company continues to keep relationship, especially for maintenance of the stage technology and upgrading of the stage system.

Decima also encourage relationship with designers, technicians and consultants, such as stage designers, acousticians, light designers, scenographers and set designers, to improve the company skills.

1/2019 edition

Decima department fields

Fly System & Rigging
- Stage Grids
- Stage winches
- Chain hoist systems
- Counterweight rigging system
- Lighting battens
- Lighting bridge system
- Fire safety curtains
- Motion Control system

Staging
- Stage and orchestra platforms
- Modular adjustable platforms
- Modular telescopic platforms
- Chain hoist systems
- Counterweight rigging system
- Lighting battens
- Lighting bridge system
- Fire safety curtains
- Motion Control system

Stage curtains and draperies
- Front curtains: Traveler curtains, Tableau curtains, Austrian curtains
- Stage Curtain track system
- Proscenium drapes
- Black box system
- Backdrop and cycloramas
- Several decorations and passementeries
- Reproduction of original embroidered decorations
- Curtain for audience (FOH) areas

AV integrated systems
- Lighting systems and controls for stage and show
- Architectural lighting systems
- Video and movie projections
- CCTV systems
- Public address systems
- Simultaneous translation
- Electroacoustic design system
- Projection screens

Acoustical solutions
- Acoustic orchestra shells
- Gran Teatro Ceresium
- Haydn
- Acoustical cladding and ceiling solutions for theatres
- Variable reverberation system
- Acoustic projects

Seats
- Fold-away seat system
- Flexseat
- Seats for theatre lodges
- Armchairs for theatres
- orchestra and musician chairs
Hystorical Theatres

Since 1948
Teatro Galli
Rimini

**Fly system**
- Timber and steel stage grid
- Multiple hoist rigging system
- Single point hoist system
- Light battens
- Motion Control system

**Staging and acoustic cladding**
- Orchestra pit platform
- Freight and scenery stage lift
- Timber stage/orchestra flooring
- Removable timber stage floor panels
- Orchestra pit acoustic plywood cladding and movable panels

**Curtains and orchestra shell**
- Front traveler decorated curtain
- Center stage traveler curtain
- Curtains rigging system
- Proscenium velour teaser and draperies

**Stage lighting**
- Dimming system
- Light control boards

**AV integrated system**
- Public address
- TVCC
Teatro Carignano
Torino

House Traveler Curtain in velvet and 3 different proscenium drapery Borders, with track and fly system. Draperies for the whole audience areas. Decorated damask fabric acoustic cladding of the lodges.
Stage light control system with 248 digital dimmers mod. ETC “Sensor” and lighting control board.

Orchestra pit platform
Movable stage
Stage grid
Hoists system
Chain hoists
Gran Teatro La Fenice
Venezia

Fly system
- timber and steel stage grid
- electrical hoist rigging system
- Manual hemp rigging system
- Manual counterweight rigging system
- Fire safety curtain
- light battens
- proscenium lighting bridge
- projection and translation screen
- Motion Control system

Staging
- Orchestra pit platform
- Timber stage/orchestra flooring

Curtains and orchestra shell
- Main tableau decorated curtain with 1100 gold leaf leather flowers
- Curtain rigging system
- Proscenium velour teaser and draperies
- Black box
- multilayer acoustic curtain
- orchestra pit acoustic plywood cladding and movable panels
- Orchestra shell
Teatro Massimo Bellini
Catania

- Front traveler curtain and proscenium teaser, made in velvet with decorations like the original
- Curtains in audience areas
- Curtain rigging system
- Draperies in lodges and royal lodge, decorated as the original
- Chairs for lodges and royal lodge
- Electrical hoist rigging system
- Light battens
- Hydraulic orchestra pit platform
- Refurbishment of the painted coat of arms
Teatro Sociale
Trento

Fly system
- timber and steel stage grid
- electrical hoist rigging system
- Manual hemp rigging system
- Fire safety curtain
- light battens
- proscenium lighting bridge
- Motion Control system

Staging
- 30 stage platforms
- 2 Orchestra pit platform
- Timber stage/orchestra flooring

Curtains and orchestra equipment
- Main traveler curtain and track rigging system
- Proscenium velour teaser and draperies
- orchestra pit acoustic plywood cladding
- Orchestra seats and music stands
Teatro Massimo di Ortigia
Siracusa

- Steel stage grid
- Front traveler curtain and track rigging system
- Velour decorative drapery borders
- Stage black box
- Manual hemp rigging system
- Audience area velvet curtains and draperies
- Acoustic decorative fabric damask for theatre lodges and balconies cladding
- Draperies of the lodges and balconies
- Audience armchairs
- Lodges and balconies chairs and stools

Teatro Sociale Arrigoni
San Vito al Tagliamento

Audience Curtains and drapes
- Audience area velvet curtains and draperies
- Acoustic decorative fabric damask for theatre lodges and balconies cladding
- Draperies of the lodges and balconies
- Audience armchairs
- Lodges and balconies chairs and stools

Fly system and stage curtains
- Front traveler curtain and track rigging system
- Velour decorative drapery borders
- Stage black box
- Manual hemp rigging system

Staging
- Timber stage flooring and scenery traps
Steel rigging frame beams for the track of the new rolling lifting hoists. The steel frame is completely integrated into the XIX century existing wooden beam system of the stage roof, without affecting its characteristics and appearance.

- Fly system, automated and manual hemp
- Orchestra pit platform and stage/orchestra timber flooring
- Stage curtains and black box
- Acoustic decorative fabric damask for theatre
- Restoration of the original lodges chairs and stools
Contemporary Theatres

Since 1948
Teatro Radar
Monopoli

Fly system
- Timber and steel stage grid
- Multiple winch rigging system
- Single point chain hoist system
- Stage light battens rigging system
- FOH light battens rigging system
- Manual hemp rigging system
- Pin rails for manual hemp
- Motion Control system

Staging
- Orchestra pit platform
- Freight and scenery stage lift
- Fold-away integrated seat system
- Fold-away seat system for handicapped

Curtains and orchestra shell
- Front traveler curtain
- Curtains rigging system
- Proscenium drapery borders
- Black box

Stage lighting
- Dimming system
- Light control boards
- Stage lighting

Congress Centre and Lecture Halls

Since 1948
"Salle X" Unesco Headquarters
for the Azerbaijan Permanent Delegation

- Renew of the international delegate tables, with any cable and AV connection.
- Entrance new desk area and Café.
Stage lighting system of the Conference Halls and Meeting Rooms:
Stage lighting control System in several halls, with signal distribution on Ethernet ETC Net3 basis, connected to a general direction of supervision and safety, with advanced diagnostics systems.

According to their different dimensions, the halls are provided with stage lighting control desk, from the ETC wide range (ION, SmartFade, ML), with a mixed distribution of the Ethernet/DMX512 signals to allow the controls of any type of lighting fixtures.

Lighting fixtures:
• 150 fresnel fixtures, 650/1000/2000 W
• 32 moving light Revolution
• 20 PC 2500 W projectors
• 56 profile zoom spot 25°/50° - 750 W
• 10 low voltage profile spots, 1200 W

Medal Plaza Stage
Winter Olympic Games
Torino

- Fastage wood-acoustical flooring with metal structure for orchestra pit
- Stage lighting with control system
- Lighting metal towers with moving lights

Design and supply of the steel and aluminium structures for the roof of the Medal Plaza Stage, for the Turin Winter Olympic Games 2006.

Arena Romana
Verona
Supporting structure made of aluminium trusses with main grid of 22x20 m and carrying capacity of 40 tons about. Two side grids of 12x4 m, for audio and video equipment hanging, each with carrying capacity of 8 tons. Everything is moved by 28 motorized winches, 2 tons, necessary to guarantee a quick preparation. The fast and the safe positioning of the equipment (luminaires, spots, sound boxes, etc.) is an important technical contribution to switch over from sport space to shows and events space.

Cruise Ships: Rigging & Curtains Since 1948
MSC Meraviglia: maiden voyage June 2017
- Supply and installation Aft Lounge area:
  - 13 motorised roller blackout blinds
  - 13 motorised roller blinds
  - Perimeter curtain manufactured in several pieces for the side stage areas complete with tracks.
  - Austrian curtain at bottom of Pandora box
  - Intermediate curtain in double voile black and silver inside Pandora box
  - Several masking curtains for rails, carousel structure, outside of all Pandora box area

MSC Bellissima: maiden voyage March 2019
- Sister-ship of Meraviglia conceived with the same equipment and curtain system, entirely in black colour for Aft Lounge Area.
- Further in Main Theatre stage, supply of Front curtain in green/blu color, velour backdrop and intermediate curtain in black velour and various maskings.

Carnival Vista: maiden voyage May 2016
- Austrian backdrop curtain in the Grand Hall stage
- Net Led Wall side maskings in the outdoor pool area

Wartsila – VIKING Jupiter Cruise: January 2019
- Mechanism for movement of Led Wall in the swimming-pool area
- Aft Lounge Front traveler curtain made in three layers: front side in white voile, the middle part in blue velvet and the back in fabric.

Wartsila – Costa Venezia Cruise: January 2019
- Backdrop curtain in velvet amethyst colour
- Front traveler curtain in fabric

Seabourn Encore: maiden voyage December 2016
- Backdrop curtain in velvet amethyst colour
- Front traveler curtain in special design velvet amethyst colour

Masque Lounge
- Front traveler curtain in fabric reproducing buds in amethyst colour
- Backdrop with star cloth effect curtain

Gondola Plaza
- Front traveler curtain in blue voile light blue color and an underlayer in fabric

Work in progress:
MSC Grandiosa: sister-ship of Meraviglia and Grandiosa
- Maiden voyage foreseen within end of 2019.

MSC Cruise: MUSICA – PREZIOSA – SPLENDIDA – ARMONIA
Maintenance of the stage area, curtains and of the movement equipment on stage.

Seabourn Ovation: maiden voyage on June 2018
In 2018, Seabourn is introducing Seabourn Ovation, a sister-ship to the already prestigious Seabourn Encore. Seabourn Ovation represents another welcome stage in the evolution of small-ship cruising, which Seabourn pioneered and has consistently expanded and enriched. Both ships will deliver a wealth of new concepts, a fresh vision and a host of illuminating ideas to delight the world’s most discerning travelers. Seabourn Ovation will be the second new ship to expand and build on the line’s award-winning and highly acclaimed fleet of Odyssey-class ships, which revolutionized ultra-luxury cruising with enhanced accommodations and innovative amenities when they were introduced between 2009 and 2011. Sister ship Seabourn Encore was introduced in Singapore on January 7, 2017.
Decima is highly skilled in design, supply and install theatrical scenery for multipurpose sets and different performances, into Opera Houses, Drama Theatres, Ballet and Concert halls. Our team is able to transform the ideas into reality, giving a technical aspect to what has been imagined for the show. We have skills to design and create the entire stage equipment, with different machines for special effects, enhancing the strength of each individual project. The spirit of the stage comes to life in creative and original solutions, meeting the practical and safety requirements both for technical operators and artists.
DIE LUSTIGE WITWE (THE MERRY WIDOW) - LA FENICE - VENEZIA
Fondazione Teatro La Fenice together with Fondazione Teatro dell’Opera di Roma co-production.
Decima has reproduced three scenography for the Franz Lehár Operetta: a bank, a dance hall and an office, whole consisting of equipped walls on Wagons.
Printed curtain and glass walls design, based on sketches of Paolo Fantin scenographer.

L’ITALIANA IN ALGERI - Sailing Ship - LA FENICE - VENEZIA
L’Italiana in Algeri is an operatic dramma giocoso in two acts by Gioachino Rossini to an Italian libretto by Angelo Anelli, based on his earlier text set by Luigi Mosca.
Decima has created the Sailing Ship scenography, for this production.

AQUAGRANDA - LA FENICE - VENEZIA
50 years later, La Fenice theatre wanted to recall the tragic event of November 4th 1966 Venice flood, with the drama in music “Aquagranda”, which inaugurated the 2016-2017 lyrical season on the fiftieth anniversary.

GIULIETTA E ROMEO - TEATRO ALLA SCALA - MILANO
Decima has developed a very big book scenography with 200 m² of pages - movable cushioned dance floor, covered with a dance mat, metal structure with electromechanical drive devices for 180° rotation of one of the two pages – the whole installed on pivoting wheels with pneumatic lifting movement.

MACBETH - LA FENICE - VENEZIA
Once again La Fenice theatre, has required our Company Skills for some Scenography of the “Macbeth” by Giuseppe Verdi, opening Opera of the new season.
Decima has created the lateral bearing structures together with the supporting track for lighting devices.

DON GIOVANNI - RADIO CONTROL MOVABLE WAGONS
2 radio-controlled monoliths projected for free movement on stage with movable deflectors and luminous screens.
For this Puccini Opera production, Decima has developed a Sloping moving Floor, with wagons in several modules, included upper tracks for sliding movement.

For this Béla Bartók Opera production, Decima has developed three Radio-controlled Wagons, for free movements into the stage.

For this Wagner Opera production, Decima has developed five synchronized Radio-Controlled Wagons for the movement of a Vessel.

For this leoncavallo Opera production, Decima has electrified four vintage little vans.

For this Fabio Vacchì Opera production, Decima has developed a Mobile Support Structure, for the sculpture designed by Arnaldo Pomodoro.

For this Giacomo Puccini Opera production, Decima has developed a complex of seven towers to support the Scenography. The 3.50 meters vertical movement is activate by electromechanical Spiralift System actuators.

For this Richard Wagner Opera production, Decima has developed three Movable Wagons activated by electromechanical actuators, with additional sliding wall, based on the Director’s design.
Acoustic Orchestra Shells
Modular elements adaptable to different configurations.
Self-supporting movable Towers, complete with stabilizers, weights and swivel rubber wheels.
Sound-diffusing convex surfaces of plywood curved wood. Solid wood framework panel.
Aluminium tower supporting frame.
Reduced dimensions for storage.

Ceiling composed by a series of modular wooden panels, connected to aluminium trusses, supported and variable oriented by Rigging. Solid wood framework panel.

Ceiling: Lighting application on demand
Tower: Piano Doors on demand
Usually plywood essence: Okoume, Birch and poplar;
other timber on demand
Fire retardant wooden materials, Euroclass (B1,2-d0) reaction to fire.

Side panels movement scheme, when opened and closed including stabilizers movement; the trolley will be moved by an electric fork lift

Side panels during the operation (opened panels) including stretched stabilizers
Modular elements adaptable to different Configurations such as:
- Orchestra and chorus
- Orchestra only
- With use of the proscenium

Self-supporting movable Towers, complete with stabilizers, weights and swivel rubber wheels. Sound-diffusing convex surfaces of plywood curved wood. Solid wood framework panel. Aluminium tower supporting frame. Reduced dimensions for storage.

Ceiling composed of a series of modular wooden panels, connected to aluminium trusses, supported and variable oriented by Rigging. Solid wood framework panel.

Ceiling: Lighting application on demand
Tower: Piano Doors on demand Usually plywood essence: Okoume, Birch and poplar; other timber on demand
Fire retardant wooden materials, Euroclass (B3±dO) reaction to fire.

Ceresium

Acoustical Shell Ceresium
Acoustic shell
Haydn

Modular elements adaptable to different configurations. Wooden walls hookable together and supported by adjustable scenery braces. Plywood wall surfaces in panels with different orientation in order to reach a better sound-diffusing. Walls are connected to the roof with adjustable tilted items. Ceiling is composed by modular wooden panels, suspended and adjustable by means of motorized rigging. Reduced dimensions for storage. Usually plywood essence: Okoume, Birch and poplar; other timber on demand. Fire retardant wooden materials, Euroclass (B2-s1-d0) reaction to fire.

Orchestra Shells

Pjazza Teatru Rjal Valletta - Malta

Renzo Piano’s open-air theatre Pjazza Teatru Rjal built upon the ruins of the Royal Opera House in Malta

- Supply of wooden panels to form the acoustic chamber in the perimeter of the square
- Inverted Spiralift® application units for the first time in Europe
- In an almost 1000-seat auditorium – requiring a variety of configurations for opera, dance, theatre and concerts – two orchestra lifts were installed inversely, that is, with all their mechanical and electric components anchored underneath the mobile platform, as opposed to the bottom of the pit. By doing so, it was possible to minimize the risk of them being submerged in a water-filled pit and suffering damage.
Products
FlexSeat is a modular system of platforms allowing to hide away the seats under the floor, and changing like this, very quickly a multi-purpose hall. Through a sequence of movements carried out by electromechanical actuators, each module can hide-away or bring out the seats. The FlexSeat 2.0 system has been designed expressly for the seat S9.9 Syncron.

A motion control system allows to control all the modules at the same time, or to carry out partial open-close according to the presets established by the Customer. This allows to create halls partially occupied by seats and leave spaces for catering and/or for the disabled persons.

The system can be installed on a flat surface or on lifting mechanisms that can transform a hall on a flat surface into one with steps.
Stage curtains

“Canadian smoke” style tailoring
House Traveler Curtain and proscenium Drapery Border with draped velvet decorated with fine golden passementerie composed by fringes and borders. Remake of the city coat of arms with fabric of different colours, with strings and painted details.

Roma - Teatro dell'Opera

Two front Curtains, the first velvet Tableau with diagonal open close and the second velvet Traveler with horizontal open close. One Drapery Border with draped velvet decorated with two-colours passementerie in old-rose and brown like the original. Careful restoration of the original coat of arms and re-installation on the proscenium Drapery Border.

Faenza – Teatro Masini

House Traveler Curtain and proscenium Drapery Border, both made in 100% wool velvet, and decorated with two-colours passementerie blue and gold like the original. Remake of the city coat of arms with fabric of different colours, with strings and painted details.

Verona – Teatro Filarmonico

House Tableau Curtain made in 100% special colour linen velvet, decorated with fine golden passementerie composed by fringes and borders. Remake of the city coat of arms with embossed effect in fabrics of various colours, with strings and painted details.

Napoli – Teatro Bellini

House Traveler Curtain in red draped velvet, decorated with fine golden passementerie, composed by fringe and double border. Proscenium Drapery Border in three layers: the first red, widely draped, the second in old-rose velvet with the reproduction of 3 lyres with borders made of flowery Greek frets, based on an original drawing of 1800. The third layer also in red velvet with lower border variously shaped and decorated with fringe.

Catanzaro – Teatro Politeama

House Traveler Curtain and proscenium Drapery Border, with draped velvet and decorated with fine golden passementerie composed by fringes and borders. Remake of the city coat of arms with embossed effect in fabrics of various colours, with strings and painted details.

Ascoli Piceno

Teatro Ventidio Basso

House Traveler Curtain and proscenium Drapery Border with draped velvet and decorated with fine golden passementerie, composed by fringes and borders. Remake of the city coat of arms with fabric of different colours, with strings and painted details.

Verona – Teatro Flaminio

House Tableau Curtain made in 100% special colour linen velvet, decorated with golden fringe and wooden elements, reproduction of original flowery decoration band in goldleaf metal 4 mm fabric. Draped proscenium Drapery Border, embellished with strings, bows and fringe.

Baku – Azerbaijan State Theatre of Musical Comedy

House Curtain and Drapery Border with draped velvet and decorated with fine golden passementerie composed by fringes and decorative band.

Torino – Teatro Carignano

House Traveler Curtain in velvet and 3 different Drapery Borders draped and decorated like the original with fringe, strings, bows and decoration band with golden passementerie.

Stage Curtains
Decoration with 1,100 gold-foil leather flowers, wood and silk embroidery, fringe of metal twisted thread and wooden silvered in “Mecca”.

Venezia – Gran Teatro La Fenice

Stage Curtains

Main Curtain Decoration with several gold-foil fabric flowers and Lurex fringe. The cornucopia decoration, embroidered in the Centre of the Curtain, is inspired by an original adornment of the theatre.

S. Vito al Tagliamento

Teatro Arrigoni

Remake of the original drawing with embroidery directly on the velvet with golden silk and lurex yarns.

Fiorenzuola d’Arda – Teatro Verdi

Stage Curtains and draperies decorations

Badia Polesine – Teatro Sociale

Remake of Curtain Lurex fringe and trimming Lurex braid, similar at the original.

Torino - Teatro Carignano

Main Curtain Decoration with several gold-foil fabric flowers and Lurex fringe. The trimming Lurex braid is made inspired by an original decoration of the theatre.
Samples of handmade Lurex decorative trimming for curtain and drapes embroidery and pendants for the lower part of the curtain. Decorative design remaking of the original decorative curtain.

Manufacturing embroidery system on velvet, or as an application padded in relief.

Rimini - Teatro Galli

Detail of the coat of arms of the Rimini Municipality, embroidered on the Drapery Border.

Rimini - Teatro Galli

Detail of the Lurex trimming decoration of Curtain and Border, during the embroidery phase.

Reana del Royale

Auditorium Comunale

Prototype of the coat of arms of the Carpi Municipality, embroidered Decorative trimming embroidered on the velvet traveler Front curtain, and painted on the Drapery Border.

Carpi - Teatro Comunale

Moscow - Little Bolshoi

Spilimbergo - Teatro Miotto

Samples of handmade Lurex decorative trimming for curtain and drapes embroidery and pendants for the lower part of the curtain. Decorative design remaking of the original decorative curtain. Manufacturing embroidery system on velvet, or as an application padded in relief.
Stage Machinery: Rigging & Staging

Stage grid system

A) PRACTICABLE GRID MOD. EASY GRID
The grid is assembled on the support structure with a set of steel box profiles painted with epoxy powders, provided at the upper corners with slots which assure the quick, solid insertion of reels and pulleys. The alternation of profiles and slits, both of 60 mms, allows the preparation of stage riggings every 120 mms.

B) The alternative grid with the element with wooden central part and 2 side parts with steel box profiles with slots at the upper corners.

C) NON PRACTICABLE GRID MOD: EASY GRID
Grid with same characteristics of the practicable grid, but with box profiles assembled under the support structure. The slots are perforated in the lower corners of the profiles.

D) Details of realized grid in Teatro Regionale - Aosta

OPTIONS:
other dimensions of box profiles are available.

Stage Machinery: Rigging & Staging

Stage hoists with variable speed Liftech model (Load 500 Kg.)
Movable stage hoists with variable speed (Load: 1.000 kg)
Mobile stage platforms
Mobile orchestra platform with Spiralift system
Motorized stage hoists, multi-ropes suitable for movement of scenes in big theatres with wide forestages and high stage towers, composed by the following parts:

- Brushless type motor
- Hydraulic braking system with double shoes disc brake
- Brakes control sensor
- Single PLC control mounted on the hoist
- Load detection module
- Sensor for detection of slack ropes
- Double rotating multi-turn limit switch system
- Control sensor for breakage of rope guide
- Absolute encoder
- Ethernet control

Applied regulations: BGV C1

### Technical Features

**Super Liftech**

- **Speed**: from 0.001 to 60 m/min
- **Diameter of steel rope**: 6 mm
- **Travel of the load bar**: 25 m
- **Synchronization**: +/- 1 mm
- **Acceleration**: 1.5 m/sec²
- **Precision in repeating the operation**: +/- 1 mm electric positioning +/− 1.5 mm mechanic positioning

**Motorized stage hoists, multi-ropes suitable for movement of scenes in small and medium theatres where the variable speed lifting is required, composed by the following parts:**

- Asynchronous double-brake motor
- Single PLC control mounted on the hoist
- Load detection module
- Sensor for detection of slack ropes
- Double rotating multi-turn limit switch system
- Control sensor for breakage of rope guide
- Absolute encoder: optional
- Ethernet control: optional

**Liftech**

Rigging motion control

Innovative multifunction terminal MC3 with colour touch screen.

Very easy control and supervision thanks to chromatic associations. Navigation on wide display on full screen.

• Panel PC17” touch screen 1280x1024 pixel
• Control keyboard
• Led lighting
• Constructed with strong aluminium section
• DIN EN 573
• Powder varnishing in black or light grey
• Protection degree IP65 EN60529
• CR profiled gasket
• Mobile support on wheels

Loading motion control

The control desk is complete of joystick, knobs, potentiometers, enlightened pushbuttons, 3.8” display QVGA LCS b/w or 6.5” VGA TFT colours.

Safety equipment:

• E-stop pushbutton integrated through additional connection box.
• 2 integrated pushbuttons 3 levels, ergonomically studied for use with right or left hand, guarantee the maximum safety degree during the setup operations.
**Modular platform with variable millimetric height**

The upper frame is realized with an upper perimetrical aluminium profile and central transverses. A mechanism with jackscrews transmits the vertical movement to four articulated legs and permits the variable millimetric height. Four feet can compensate, up to 50 mm, the possible floor unevenness and are complete of hooking to the surrounding platforms. The control is easily obtained by a standard electric or battery screwer inserted into the central hole of the floor. **Options:** railings and stairs

**Control of vertical movement**

Control of vertical movement by means of a standard electric or battery screwer, introduced into a small central hole in the floor.

**Stages with modular Platforms for indoor and outdoor use**

These platforms are suitable for fixed stages and, in particular, for temporary installations, thanks to their easy storing and transport due to the components of reduced volume and weight, and to an easy assembling obtained with a quick hooking of all the components and to the height adjustment made, by means of a standard electric or battery screwer, on the top of the telescopic legs.

Control of vertical movement by means of a standard electric or battery screwer, introduced into a small central hole in the floor.

**Height adjustment of the telescopic leg with a standard battery screwer.**
Arcadia School
Dubai
Supply from Oasis Enterprises

- Flexdeck stage with railings and access stairs,
- floor covering with carpet
- trapdoor to house the supply lines for the equipment.

Bangor University
Wales
Supply from Centre Stage Uk

- FLEXSTAGE modular platforms with drill height adjustment, integrated into the hall floor.

OIC
Fondazione Opera Immacolata
Concezione
Padova

- Flexdeck stage with railings, disabled ramp, and stair
Integrated Audiovisual System

Lighting and automation

The architectural luminaires, conceived as a branch of the show equipment, provide a qualitative performance, an energy saving and a longer average life of the lamps. They satisfy the requirements of light designers, architects and planners: hotels, congress halls, museums, show rooms, art galleries, shopping centers, thematic parks, cruise ships, etc. where it is necessary to have special light sources.

The available luminaires can be: plano-convex, fresnel, profile, LED, Led Wall, moving lights, of traditional and video type.

Our planning conception consists in the automation systems of:
• Halogen, fluorescent, neon, metal iodides luminaires, darkening curtains, projectors and wind-up screens
• Light integration with audio, video and supervision for “Building Management System”
• Sensors for the control and the mixing of natural light with artificial one
• Touch screen control panels, interface with third systems, controls: Dali, DSI, DMX512, Ethernet, LanWorks, RS232, IN/OUT analogic, volumetric and luxmetric sensors, relay power units and dimmers from 6 to 60A of type SCR, IgbT and sinusoidal, integration with stage lighting control system.

AV Integrated Systems

AV Integrated systems
Seats
Decima is always attentive to client satisfaction, even with the most demanding clients, since it designs and engineers exclusive “Solutions on Demand” that improve product design and functionality. The Company works with the client to analyse and identify needs and expectations, considering environmental constraints as well as safety regulations, durability and acoustics. Decima Italia designers and the Research & Development Department elaborate the design according to the initial parameters identified.

**Première**
Innovative system of seatings that allows to rationally use the spaces and also ensures excellent levels of comfort. The synchronized movement seat-backrest allows to compact the armchair in extremely reduced spaces, with a resulting large freedom of movement between the rows, to the advantage of the flow of people and the cleaning operations. The armchair folds in a precise and noiseless way thanks to a patented device that cushions and accompanies the movement.

**Royale**
Comfort and generous proportions combined with a modern design. The perfect solution providing excellent results in terms of both quality and comfort. Roomy and spacious, this finely designed high quality ergonomic chair is both modern and dynamic, combining wood with luxurious materials. There are two models to choose from: full padding with top stitching or elegant upholstery with wooden accents on the armrests, backrest and seat. The special, micro-springs in the seat padding guarantee comfort. An optional foldaway writing tablet that stores neatly into the side, and a modern, multimedia flat-screen system on the chair back are also available.

**Tempo**
Shape and functionality equal comfort. An extremely flexible and original chair, Tempo has been designed with a range of variants and available accessories, in terms of both shape and materials. In addition to the fully padded and fabric upholstered model, the Tempo model, with wooden backrest, upper armrests and underseat finishes to create a strong visual impact is also available.
Concerto

Harmonious balance for best use of space. This compact model has sides that touch the floor, opening upwards thus increasing its dimensions. Its special design creates a large, practical space between the rows. Whether entirely upholstered or with wood accents, this chair is the ideal solution for theatres, auditoriums and conference rooms. The chair can be fitted with a large, foldaway, anti-panic writing tablet that stores neatly into the side or to the back of the seat. The side is also suitable for storing multimedia cables.

Design Giovanni Baccolini

Eidos

The refined essentiality of Eidos is the innovative answer to the traditional request of combining design and functionality and optimizing spaces. The metallic grey color of the structure, coupling with the wide range of fabrics and leathers available, allows the designers to free their imagination in varied chromatic solutions.

Design Giovanni Baccolini

Metropolitan Operà

Operà is an armchair which contributes to create an atmosphere of elegance and comfort thanks to its classic and refined design. No doubt a prestigious solution for the furniture of theatres, auditoriums, conference halls.

Design Giovanni Baccolini

Seats

Eidos

Elegance and functionality, all in one. To facilitate use, Papillon opens and closes easily, like the wings of a butterfly. In the ‘open’ position, it functions as a comfortable seat, for meetings, conferences or other uses. It is easy to store in the ‘closed’ position thanks to its reduced size, which facilitates its storage and future use.

A versatile chair that stands out, for modern and elegant meeting rooms.

Design Giovanni Baccolini

Concerto
Phoenix

Design inspired by “Louis XVI” style. Internal structure in beech. The armchair is single, with 4 curved legs of solid beech, varnished with different colours on demand. On sight rounded wood profiles, finished with more marked colour. Sides, frame and tip-up seat with wood frame and elastic belts, padded with fire-retardant polyurethane and covered with fire-retardant velvet of fabric.
Certification reaction to fire: IT 1IM
Options: Seat number plates

Paisiello

Chair and stool for historical theatre lodges
Design, inspired by “Louis XV” style and made in solid maple or beech. Stool with seat and chair with seat and back: with elastic belts, padded with fire-retardant polyurethane and covered with fire-retardant velvet or fabric.
Certification reaction to fire: IT 1IM
Options: Seat number plates

Verdi

Chair and sofa for historical theatre lodges
Design, inspired by late ’800 style and made in solid maple or beech. Stool with seat and chair with seat and back: with elastic belts, padded with fire-retardant polyurethane and covered with fire-retardant velvet or fabric.
Certification reaction to fire: IT 1IM
Options: Seat number plates

Salieri

Chair and stool for historical theatre lodges
Design inspired by “Louis XVI” style and made in solid maple or beech varnished with different colours on demand. Stool with seat and chair with seat and back: with elastic belts, padded with shaped fire-retardant polyurethane and covered with fire-retardant velvet or fabric.
Certification reaction to fire: IT 1IM
Options: Seat number plates

Rossini

Chair and stool for historical theatre lodges
Design, inspired by late ’800 style and made in solid maple or beech. Stool with seat and chair with seat and back: with elastic belts, padded with fire-retardant polyurethane and covered with fire-retardant velvet or fabric.

Seats
Liberty

Ergonomic chairs with structure of steel tubular, stove enamelled with epoxy powders, black color. Seat and back with structure of beech wood, shaped, varnished natural, or padded with shaped fire-retardant polyurethane and covered with fire-retardant velvet or fabric.

Back part of back of black integral polyurethane. Back adjustable in height and horizontal depth.

Fire homologation: class 1IM

M1 Musician seat
Especially for the strings and the brass

C-D1 Double bassist chair
Seat with pneumatic adjustment of height
2 Footrests with adjustable height and rotation

D-C1 Conductor chair
Footrest at 46 cms from seat height

T-K1 Kettle-drummer chair
With pivoting seat and with pneumatic adjustment of height
Ring 65 cms diam. adjustable in height
Base with 5 feet

B1 Drummer chair
Pivoting seat with height adjustment
Base with 5 feet

Bauhaus

The essential design is inspired by the “Bauhaus” movement. The modular construction, to facilitate and economize on transportation, assembly and any other eventual maintenance, consists of only three units.

Options: seats and rows numbering

Back + seat + side
The structure, entirely made of steel pipe painted with epoxy powders, (stoving method) consists of frames for backs, tip-up seats and sides with self-supporting base, also suitable for attaching (fixing, fastening) to flat or sloping floors.

Backs and tip-up seats are finished with fire-proof fabric stretched on the respective frames. Italian Fire-retardant Homologation: class 1

Options: Seat and rows numbering

Bauhaus open-air
Same characteristics as the Bauhaus model, but with the back and tip-up seat of micro-perforated steel sheeting (for rain drainage) painted with epoxy powders (stoving method)
