At the beginning of the sixties farmers realized that it was more profitable to breed chickens in battery cages than in the farmyard. This was the beginning of a great development in the poultry field which brought chicken breeding to an industrial level.

It was during this period that FACCO & C. S.p.A. started its business in Italy, later expanding also in Europe.

The second event was the introduction in the market of layer breeding in battery cages, and FACCO & C. S.p.A. was, in some countries and particularly in France, the leading firm in this second stage of development.

“NEVADA” “CONFORT” “CALIFORNIA” batteries played a leading role in the development of European poultry breeding.

In the 70’s FACCO concentrated mainly on the production of hundred of kilometres of cells becoming the biggest battery manufacturer in the world, and it started occupying in sectors connected to the poultry as feed mill plants cold rooms and slaughter house.

Its manufacturing department, designed for mass production, employed approximately 400 workers.

The dies and part of the machines were designed and built by FACCO & C. S.p.A. itself to optimise the product both technically and economically. Subsequently the poultry industry underwent further development boosted by the new technologies, the improvement in poultry varieties and cost reduction of the final product. This stage was characterized by the demand for large installations which would previously have been unthinkable. These were complete turnkey systems and provided with all necessary infrastructures which often also included building and foundation work.

This huge development in the chicken breeding and also the fact that FACCO & C. S.p.A. had expanded its market to almost all the Continents, brought about profound changes in FACCO’s internal structure and organization.

The buildings, internal equipment, ventilation, manure cleaning and composting system and all the other utilities that the new installations required, had to fit not only the breeding dimensions but also all the other local requirements. FACCO & C. S.p.A. always very alert to market changes, became aware of this development in time and it succeeded in becoming a leading firm also in the field of big installations.

As regards the manufacturing side, the changed requirements, demanded different items to be produced rapidly for individual installation.

Here again, FACCO & C. S.p.A. succeeded in finding the best solution by radically transforming its factory. The various specialized departments were equipped with high-tech machines (laser machines, multi-job machines, computerized work centres etc…). The various specialist departments were given managerial independence so that outside work could be obtained in order to use the machinery in several shifts, all of which enabled the firm to recoup its investments much more rapidly.

In the eighteen, FACCO & C. S.p.A. has carried out various turn key poultry projects in which it was included: feed mill, parent stock farms, broiler farms, hatchering plants, slaughtering plants, table egg farms in different Arab Countries as: LIBYA, ALGERIA, MOROCCO, KUWAIT, KINGDOM OF SAUDI ARABIA, UNITED ARAB EMIRATES, OMAN, EGYPT, JORDAN, SYRIA, RUSSIA, UKRAINE. In the meantime FACCO has developed its main activity, battery cages sales, in other countries like Japan, Malaysia, Thailand, Vietnam, Australia, United States, South America, Spain, France and several others.

During the last fifteen years, FACCO & C. S.p.A. has also improved its sales and poultry houses projects in many other different countries based in the five continents, looking always at the new markets in the world, but never forgetting the countries where it has built its history.
In addition; Agent’s and affiliate offices in more than 70 countries: Albania, Algeria, Argentina, Australia, Austria, Belarus, Bulgaria, Cameroon, Canada, Chile, China, Colombia, Croatia, Cyprus, Egypt, France, Germany, Greece, Ghana, India, Indonesia, Italy, Libya, Kazakhstan, Kuwait, Malaysia, Mali, Nigeria, Netherlands, Pakistan, Paraguay, Philippines, Portugal, Qatar, Dominican Republic, Saudi Arabia, Senegal, Singapore, Slovenia, South Korea, Spain, Sudan, Thailand, Turkey, UAE, United Kingdom, Ukraine, Uzbekistan...

Due its technical office, advanced technology and experience, FACCO is able to provide the right material and solutions according the market request. FACCO equipment, now found in continents, guarantees the productive capacities and efficient distribution and assistance network. The tangible sign of professionalism is the existence of “old” clients who came back to FACCO after years of successful work.

Another point worth mentioning is what makes FACCO unique: we have the desire to get better and better, this is one of the reasons why we constantly invest in production and automation technology systems which enable us to offer the best price/quality ratio.

Thanks to this desire, in 2017 we are 700 worldwide employees working directly and indirectly, including 200 specialized technical staff at production sites and offices at the headquarters of FACCO & C. S.p.A. in Marsangio, Padova Italy, with offices located on every continent and all over the world:

• FACCO KK in Japan;
• FACCO USA in the U.S.A;
• FACCO RUS in Russia;
• ARTABAS ARTEFATOS DE ARAME BASTOS Ltda in Brasil;
• FACCO CHINA in Beijing;
• FACCO ALGERIA in Algeria;
• FACCO MAROC in Maroc;
